## Administration board **∢**····· Biotechnologist, business manager Instruction for informed consent and Data acquisition Instruction for tissue collection De-Identification and coding of specimen/information Control of tissue asservation, transport and procurement · Distribution and allocation of tissue Instruction for tissue supply of tissue or processed tissue components Documentation of tissue allocation Hospital

## Ethical board Scientific board Theologist, Philosopher, Lawyer Surgeon, Pathologist, Researcher Release of rules and guidelines for tissue supply Review of research projects Control of tissue distribution and allocation Approve researcher and tissue banks/procurement centers Approved Researcher/ user of human tissue Scientific/ commercial research · Regulation of inquires, list of priority Distribution of tissue: academic 51% to 49% commercial Reevaluation of research projects · Charged for administration

· Reports of a potential donor

- Allows HTCR:
  - ✓ to ask for tissue donation
  - ✓ to instruct physicians to ask for:

Consenting patient

- "informed consent"
- anonymised patients data
- √ tissue collection

## Approved tissue banks and procurement centers

University based laboratories or Commercial services

- Performing of:
  - √ tissue asservation
  - ✓ tissue procurement e.g. cell isolation
  - ✓ tissue preservation by freezing, slizing etc.
- · Managing of transport for tissue allocation
